DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

1. Group I, claims 1-10 and 16-27, drawn to an isolated χ -conotoxin peptide, a composition comprising a χ -conotoxin peptide, a chimeric peptide comprising a segment of sequence of χ -conotoxin peptide and a segment of sequence of another biologically active peptide, a use of χ -conotoxin peptide in the manufacture of a medicament, and a method for the treatment or prophylaxis of urinary or cardiovascular diseases, or mood disorders or for the treatment of pain or inflammation, comprising administering to a mammal a χ -conotoxin peptide, classified in class 514, subclasses 14, class 530, subclass 327, and class 435, subclass 69.7.
2. Group II, claims 12, 13 and 15, drawn to an isolated nucleic acid comprising a sequence of nucleotides encoding or complementary to a sequence encoding a χ -conotoxin peptide, and a genetic construct comprising a vector and a nucleic acid capable of encoding a χ -conotoxin peptide, classified in class 536, subclass 23.5, and class 435, subclass 320.1.
3. Group III, claim 14, drawn to a monoclonal or polyclonal antibody specific to a χ -conotoxin peptide, classified in class 530, subclass 387.1.

Art Unit: 1653

4. Group IV, claim 11, drawn to a use of χ -conotoxin peptide in a receptor binding assay to test the activity of a molecule as an inhibitor of neuronal noradrenaline transporter, classified in class 514, subclasses 14, class 530, subclass 327.

The claims of these groups are directed to different inventions, which are not linked to form a single general concept. The claims in the different groups do not have in common the same or corresponding technical features. In particular, each group is directed to distinct chemical entities and/or methods, which use different materials and produce different effects. Accordingly, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept and lack of unity is deemed proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (703) 308-9437. The examiner can normally be reached on 8.00-4:30, Mon-Fri.
